DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-28**, drawn to a device, network, system and method providing an interface that allows a user to initiate a connection by using tags, classified in class 455, subclass 418.
 - II. **Claims 29-49**, drawn to a network, device, and method comprising location detection, associating locations with mobile device characteristics defining themes for controlling the device, classified in class 455, subclass 456.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as allowing a user to initiate a connection by using tags, while invention II has location determination and location based features. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Douglas Goldhush on December 19, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
